

## **TREADSURE™ Traction Enhancement**

TREADSURE™ is unlike other anti-slip products. You can easily apply TREADSURE™ to most indoor and outdoor solid surfaces to increase traction, decrease slip and the risk of slip and fall accidents. No special equipment or tools are required and treated surfaces can be used immediately, even when wet.

### **How Does It Work?**

The TREADSURE™ treatment provides an invisible nanotechnology coating that has millions of small peaks. These peaks increase the traction of the surface and reduce slip. The original physical surface is not changed in any way with no etching, no trip hazards, and no colour change.

### **Treatment of Floor Surfaces**

NOTE: Although we have not seen any damage to surfaces we have treated we always recommend testing the TREADSURE™ product on a small inconspicuous area before a full treatment is applied.

### **Please read entire instructions before proceeding.**

1. Ensure the surface to be treated is clean, free of wax and dry.
2. Apply the TREADSURE™ solution using a pump sprayer (large areas) or spray bottle (smaller areas). Ensure the area to be treated is saturated and remains saturated with TREADSURE™ for up to two hours (surfaces with high usage and spoiling) and at least 25 minutes (smooth surface such as marble or ceramic tiles). If the product starts to dry in areas apply more TREADSURE™. On most surfaces the longer the product is left on the surface the higher the traction is enhanced.
3. Test the surface with a clean shoe or boot. You should be feeling increases traction and reduced slip.
4. When you are satisfied with the traction enhancement rinse the TREADSURE™ product from the surface with clean water using a mop or wet vacuum. TREADSURE™ is environmentally safe and can be rinsed straight into drains.

You have now given your floor the TREADSURE™ treatment.

### **Re-Application**

Longevity of treatment depends on the use and the environment that the surface is exposed to. Most surfaces will have increased traction for at least three months and up to one year. Reapply TREADSURE™ when you notice a decrease in traction and an increase in slip.

### **Safety Precautions**

**For external use only.** Keep out of reach of children and pets. Avoid contact with eyes. Flush eyes with water and seek medical advice if irritation occurs. If swallowed wash mouth with water and seek medical attention if irritation occurs. **Skin Contact:** Wash skin with soap and water.
